

How do you
choose movies?

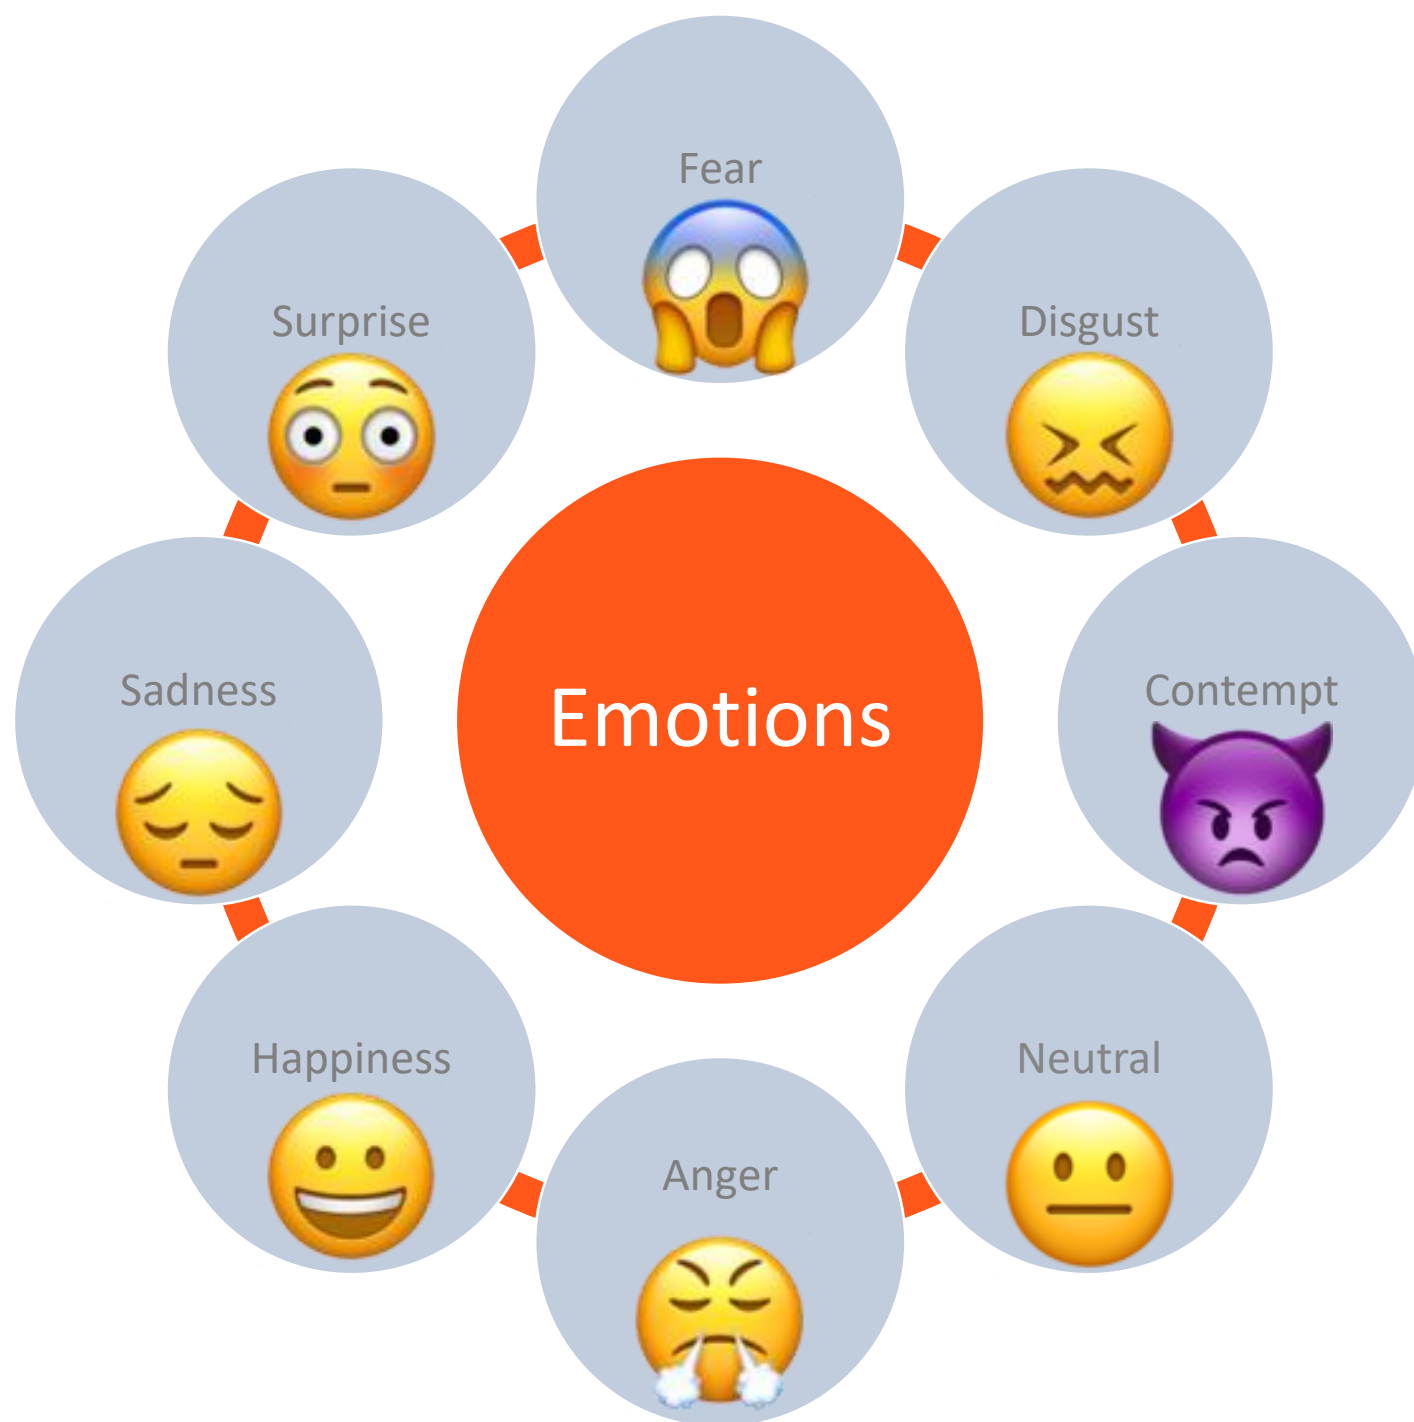

A bit similar,
isn't it?

Why?

A user is forced to
set at least few
criteria to start
search

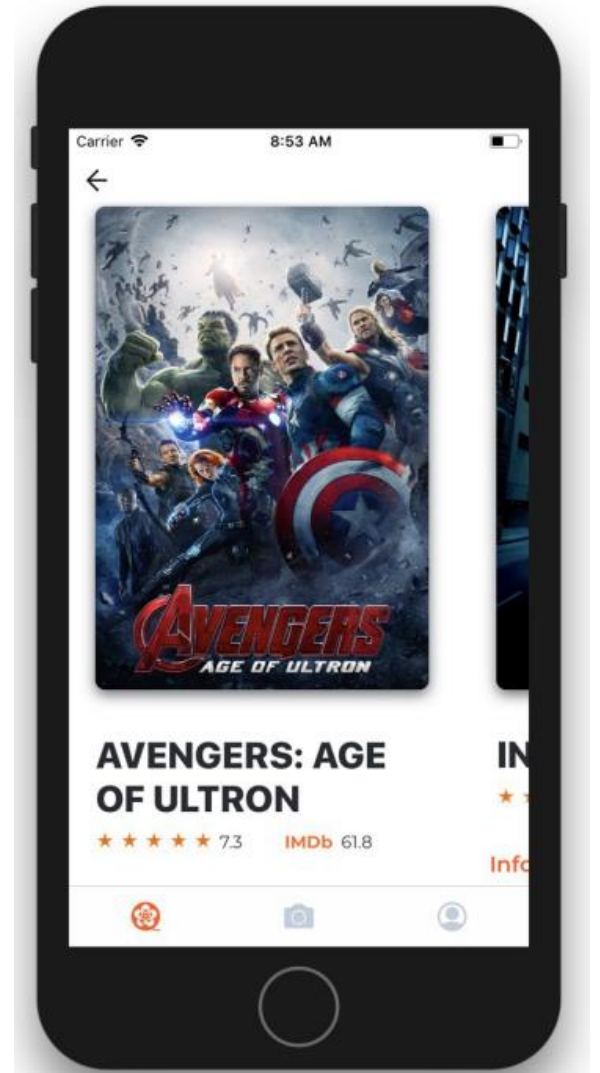

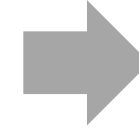

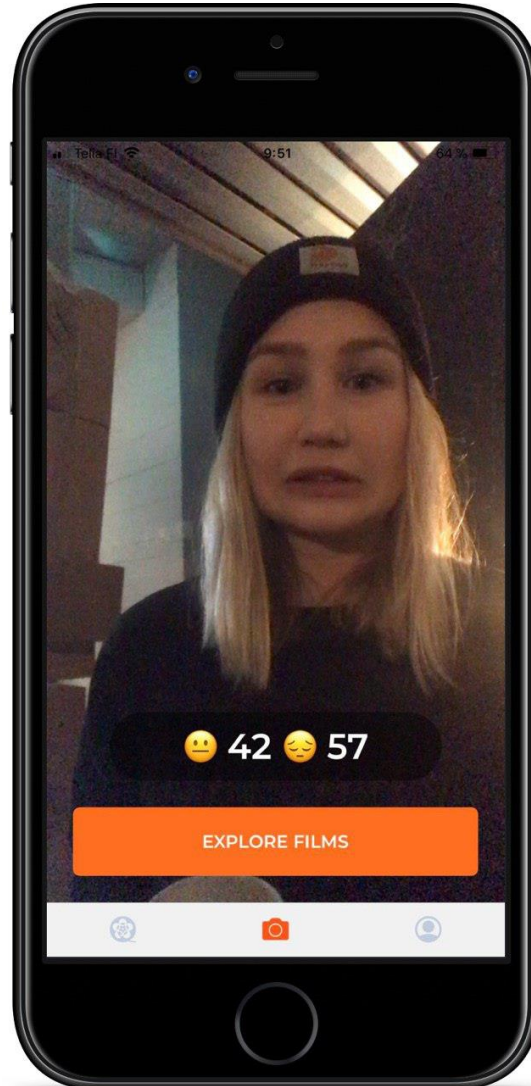

MONA

How it works?

Just scan your face and enjoy search

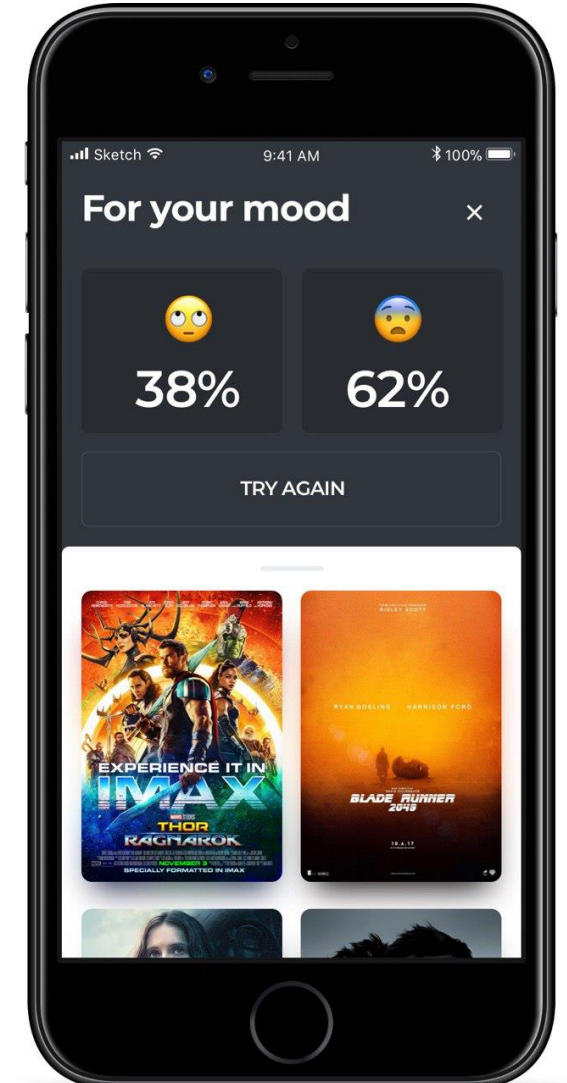

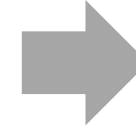

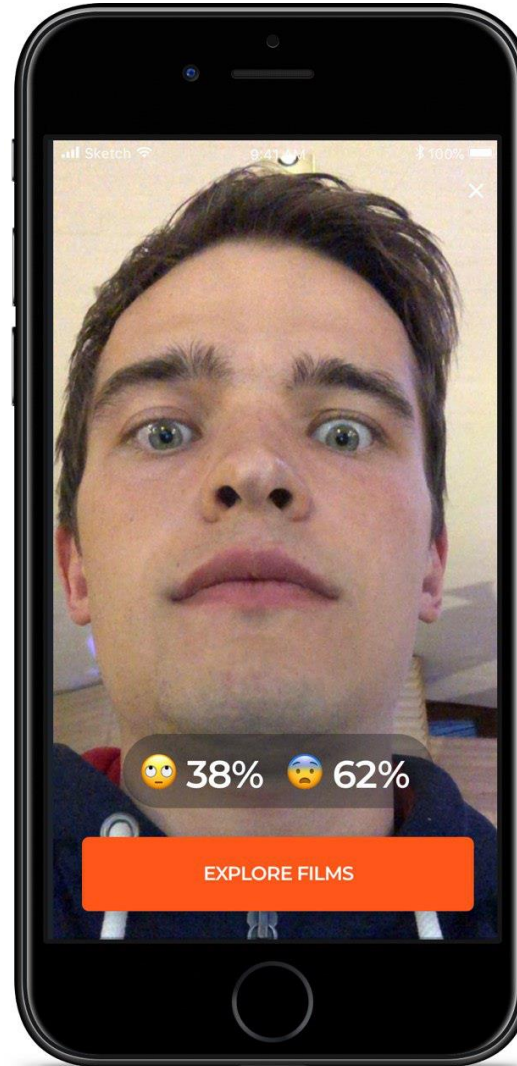

Sadness – 100%

He wants to
watch a drama

The app detects 2 user emotions and suggest movies

When you have found a great movie quickly...

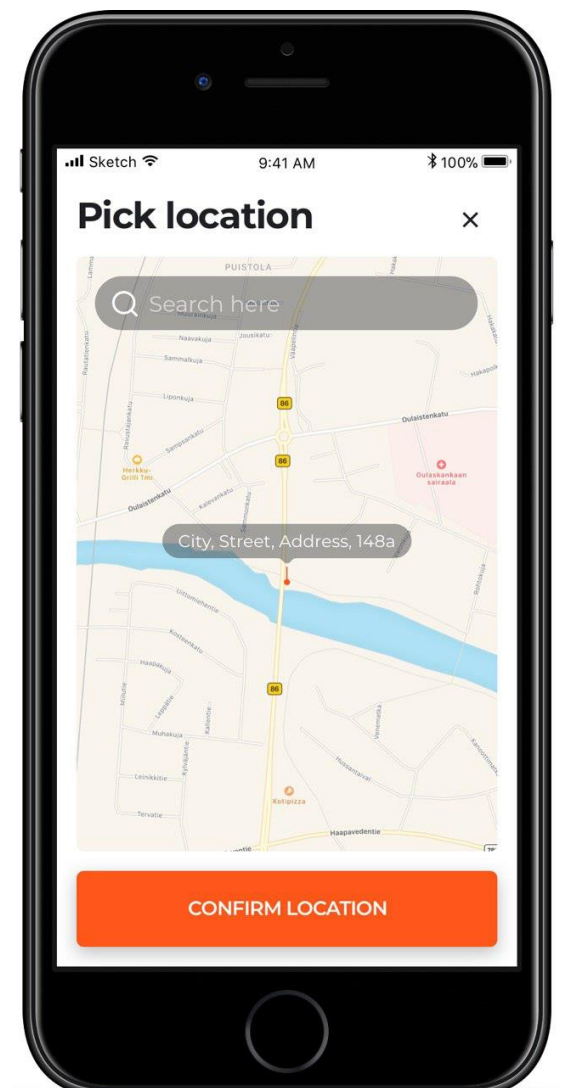

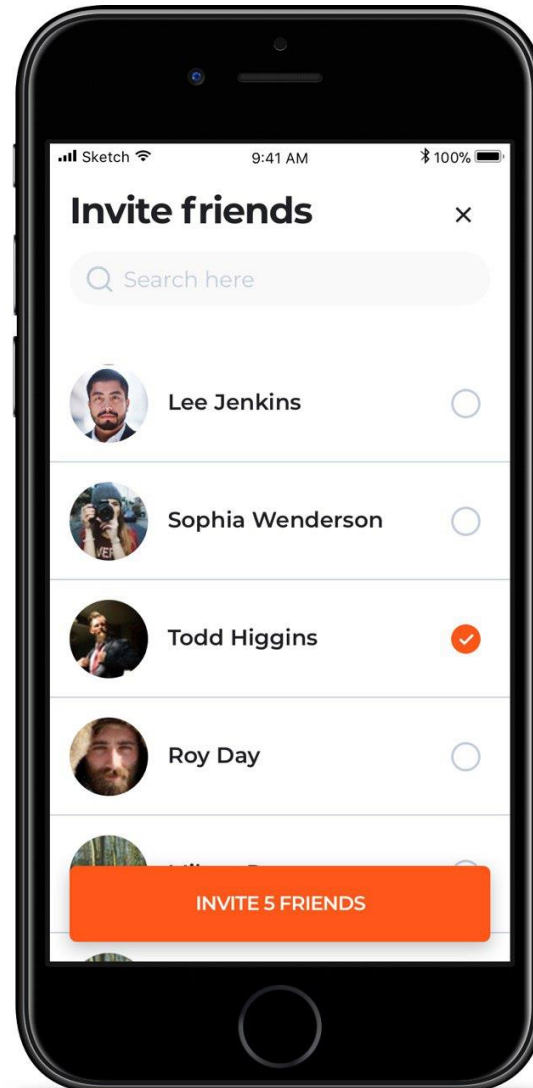

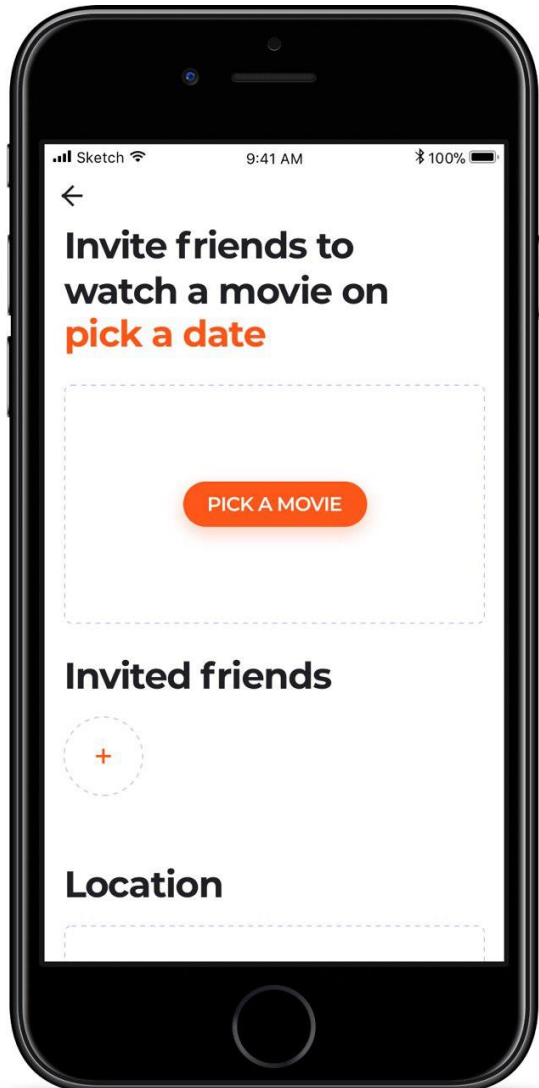

One more thing...

ONE DOES NOT SIMPLY

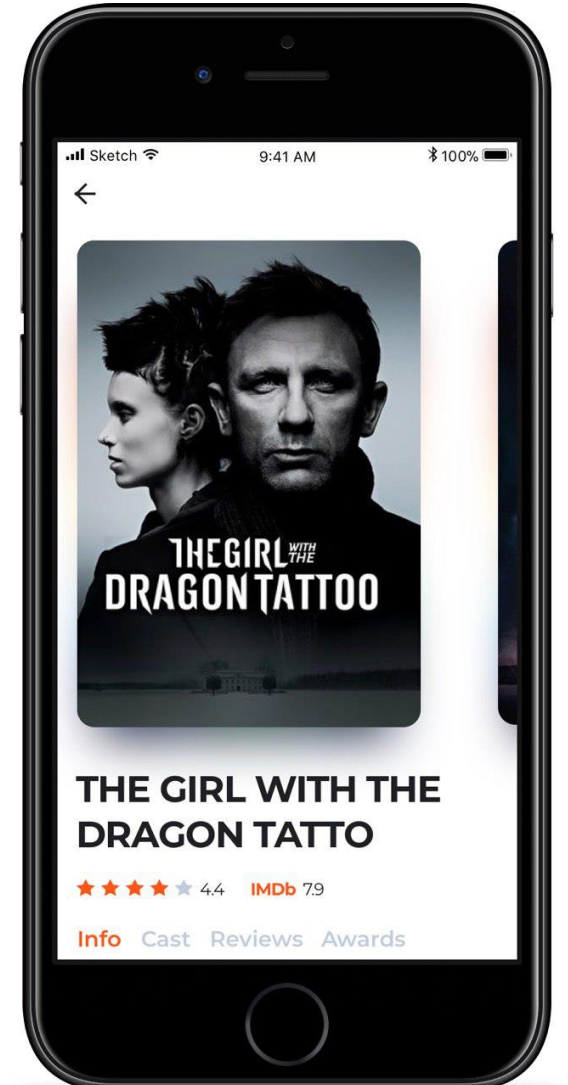

**CHOOSE A MOVIE WITH
FRIENDS**

Schedule movie sessions with friends comfortably

MONA app - movie compromises for friends

Example:

MONA

mobile app, doomed
to success
